

Talk Math 2 Me

(A mathematics seminar for students and by students)

Mathematics Education Ph.D. Student,

Micah Swartz will speak on:

Insider Trading: Advice from an NSF Graduate Research Fellow

Friday March 24, 2023
DERR 240
12:00pm-1:30pm

Abstract

Are you interested in getting paid to simply be a graduate student? Do you have an idea or problem you'd like to explore as a graduate student? Would you like to be distinguished as a "outstanding graduate student who has demonstrated the potential to be a high achieving scientist"? If you answered yes to any of these questions or would like to learn about the National Science Foundation's Graduate Research Fellowship Program, come to this week's talk to hear from Math Education Ph.D. student Micah Swartz, the math department's first recipient of the NSF GRFP. He will give an overview of the program as well as tips, tricks, and wisdom for applying for the NSF GRFP.
